TITLE INDEX

Aridity and inversion over the desert areas of West Pakistan and neighbourhood during the south-west monsoon seasons, causes of (Desai), 103.

Copper, electrodeposition of, on copper single crystal (100) face in presence of chloride ions (Nageswar and Setty), 178.

Couette flow, unsteady, of a conducting fluid between two parallel plates under a transverse magnetic field, II (Vidyanidhi), 93.

Diffraction of light by two superposed parallel ultrasonic waves, having arbitrary frequencies. General symmetry properties, method of solution by series expansion (Leroy and Mertens), 296.

Discontinuities, weak, in arbitrarily moving gas, growth of (Nariboli and others), 149.

Flow, hydromagnetic forced, against a porous rotating disk (Raju), 195.

Fourier series for H-function (Anandani), 291.

Galactic radio halo, on the existence of (Anand and others), 219.

G-function involving Bessel functions, some expansion formulae for (Bajpai), 285.

HBr, reactions of, with aromatic side chain alcohols and aromatic ethers (Radhakrishnamurti and Visvanathan), 41.

Information of Order α and type β (Kapur), 65.

Information, on negative character of (Aggarwal), 76.

Iron, separation and gravimetric determination of, using oximidobenzotetronic acid (Manku and others), 88.

Light hyperfragments, binding energy and π^+ decay of (Chaudhari and others), 228.

Lunar tidal variations in f_0F_2 in the American zone during the years of low solar activity at Huancayo, Panama and Buenos Aires—a geomagnetic anomaly effect (Rastogi), 23.

Matrices, reduction of G-orthogonal (Abraham and others), 244.

Mercuric cyanide complexes with alkali halides, a polarography study of (Agrawal and others), 123.

MHD boundary layer equations, solutions of, with transverse magnetic field and arbitrary pressure gradient (Lalitha and Ramamoorthy), 251.

Multi-nucleon stimulated decay of heavy hyperfragments (Walker and Prowse), 273.

N, N-dimethyl formamide and N, N-dimethyl acetamide, normal vibrations of (Venkata Chalapathi and Venkata Ramiah), 109.

Oxidation studies, V (Padma and Santappa), 47.

Pentafluoro-benzene, microwave spectrum of (Doraiswamy and Sharma), 53.

Peptides, cyclic, stereochemical studies on, I (Chandrasekharan), 13.

Pions 17·2 GeV pion-nucleus interactions in emulsion nuclei, coherent production of (Dubey and others), 209.

$P^{16}O$ and $P^{18}O$ the ultra-violet, and visible bands of, isotope shift studies of the (Dixit and Narasimham), 1.

Polynomial, generalized hypergeometric, in series of Hermite polynomial, expansion formula for (Shah), 324.

PO molecule, the β-system of, structure and analysis of some bands of the (Mohanty and others), 165.

Pyrimidines as possible oncolytic agents, I (Wagle and Panse), 277.

Raman and I.R. frequencies of the carbonyl group, effect of conjugation and complex formation on the (Seshadri and others), 314.

SO, isotope shift studies of the $B^3\Sigma^- - X^3\Sigma^-$ bands of (Apparao and Narasimham), 173.

Sound pulses in a homogeneous layer under an inhomogeneous half space, propagation of (Sharma), 131.

Sunspot number and 10·7 cm. solar flux, daily relative, a high resolution spectral analysis (Bhargava), 265.

o-vanillinoxime as an analytical reagent, studies on, II (Goel and others), 82.

Vinyl polymerisation, VII (Santappa and Anwaruddin), 186.
